

Operation Instructions

1. Remove scale from case and place on a smooth flat surface.
2. Press the **ON/OFF** key to power the scale. The LCD should display 0.00/0.000.
3. Use the **UNIT/SHIFT** key to choose between Kilograms (Kg) or Pounds (Lbs)
4. When charging refrigerant, place cylinder in the center of scale (do not place a cylinder over largest weight which scale can measure as damage may occur to the scale!) Attach your charging hose according to generally accepted HVAC practices, bleed air from your hose, and hit the **TARE** key to zero out the scale. Refrigerant charge will be displayed in negative numbers.
5. When recovering refrigerant, place tank in the center of the scale. Scale will display gross weight of tank and recovered refrigerant.

Electronic Refrigerant Charging Scale

RCS-7010/RCS-7020/RCS-7030

Introduction

RCS series refrigerant charging scales used for refrigerant charging, recovery & weighing of commercial A/C, auto A/C, refrigeratory systems. Portable carrying case with 223cm x 223cm platform. High capacity up to 100kgs (220lbs). High accuracy of +/-5g (0.01lb). high-visibility LCD display 66mm x 20mm & 67mm x 23mm optional. Flexible 6 inches (1.83m) coil design. Long life 9V batteries.
